Flat Dues Structure

CAA Colorado offers an optional flat rate for low volume producers to minimize the administrative and reporting costs. The flat rate is graduated based on the producer’s supplied tons into Colorado and does not vary by material category(ies) supplied into the state. Producers who supply 10 tons or less of covered materials into the state are eligible to pay flat dues according to the following schedule:

Annual Supply – Short Tons	Dues
1 to 2.5 tons	\$800
2.5 to 5 tons	\$1,600
5 to 7.5 tons	\$2,600
7.5 to 10 tons	\$3,600

Passive Eco-Modulation Factors

The 2026 due rates include the passive eco-modulation factors, as required by state law. Passive eco-modulation factors are automatically applied to producer invoices based on supply data.

Factor	Type	Impact
Detriments	Malus	+5% dues for materials that disrupt recycling
Not on MRL	Malus	Dues increased to ensure Additional Material List (AML) materials are at least 20% higher than the average of similar Minimum Recyclable List (MRL) materials; Not Collected materials are at least 10% higher than the average of similar AML materials.
High Recycling Rate	Incentive	-5% dues for materials with high recycling rates

Detailed guidance on CAA Colorado eco-modulation will be posted by **Oct. 31, 2025**. The guidance will include additional information on the passive factors that are automatically applied to producer dues and the four (4) active incentives that are available to producers for the 2026 program year.
